SKILLS SUMMARY

- **Languages:** C++, Python, Java, HTML|CSS, JavaScript
- **Core Concept:** OOP, Data Structures & Algorithms
- **Libraries/Frameworks:** Pandas, NumPy, Scikit-learn, OpenCV
- **Tools/Platforms:** Ubuntu, Git, GitHub, VS Code
- **Database:** DBMS, SQL
- **Soft Skills:** Problem-Solving Skills, Teamwork, Communication, Project Management

PROJECTS

- **Diabetes Prediction System** Mar' 26 – May' 26
 - Developed a machine learning-based diabetes prediction system using Python, enabling users to assess diabetes risk based on key health-related parameters.
 - Implemented data preprocessing, feature scaling, missing-value handling, and predictive modeling to improve the reliability and consistency of model predictions.
 - Trained and integrated a machine learning model with a Flask-based web application, enabling real-time predictions through an interactive user inter-face.**Tech:** Python, ML, Flask, Pandas, NumPy, Scikit-learn, Data Preprocessing, Feature Engineering, Predictive Analytics
- **Face-Recognition-Attendance-System** Feb' 26 – May' 26
 - Developed an automated face recognition-based attendance system using Python, enabling real-time identification and attendance tracking through facial recognition.
 - Implemented computer vision techniques for face detection and recognition, enabling the system to identify registered individuals and automate attendance marking.
 - Integrated real-time webcam processing to capture facial data and process live video frames, reducing the need for manual attendance management.**Tech:** Python, OpenCV, Machine Learning, Computer Vision, Face Recognition, NumPy, Pandas, Data Processing

TRAINING

- **Summer Internship | DSA Fundamentals: Basics to Applications – LPU** Jun' 26 – Jul' 26
Training
 - Developed a strong understanding of Java programming and object-oriented programming concepts, including classes, objects, inheritance, encapsulation, abstraction, and exception handling.
 - Developed a Desktop-Based Expense Tracker for Students: Designed and implemented an Expense Management System using Java, enabling students to efficiently record, categorize, update, and monitor their daily expenses.
 - Applied Data Management & GUI Concepts: Utilized Java Swing, event handling, data structures, and file/database management techniques to create an interactive interface for expense tracking, budget management, and financial analysis.

CERTIFICATES

- Database Management System – Infosys Springboard Jul' 26
- Programming Using C++ – Infosys Springboard Aug' 25
- Linux Commands and Shell Scripting – Skillera Nov' 24

ACHIEVEMENTS

- **Solved 100+ Problems on LeetCode** Mar' 26
Consistently solved 100+ coding problems on LeetCode, strengthening problem-solving, data structures, and algorithmic skills across arrays, strings, linked lists, stacks, queues, trees, and other core DSA concepts.
- **Secured 4th Place in PromptBuilder 2025** Feb' 25
Ranked 4th among 200+ participants in the Prompt Builder 2025 Hackathon, showcasing strong prompt engineering and problem-solving skills.

EDUCATION

- **Lovely Professional University** Punjab, India
B.Tech; CGPA: 7.69 Aug 2024 – Present
- **BandhuNath Inter College** Deoria, Uttar Pradesh
Intermediate; Percentage: 85.40% April 2021 - March 2023
- **Universal Public School** Deoria, Uttar Pradesh
High School; Percentage: 87.8% April 2019 - March 2021
